

**WELCOME TO  
TITIKSHA COMMERCE FAMILY  
POWER SAVER CARD**

**ABOUT URJA POWER SAVER CARD**

The **URJA POWER SAVER CARD** is an advanced energy-saving solution designed to help you cut down on electricity bills, protect your appliances, and create a healthier home environment — all without any complicated setup.

Using **US–German Nano Technology**, this compact card works silently in the background to make your power usage more efficient. It helps in:

**Stabilizing Voltage** – Ensures a steady flow of electricity so your devices run smoothly without sudden drops or spikes.

**Minimizing EMF Interference** – Reduces harmful electromagnetic interference that can affect both your health and your electronics.

One of the most unique features of the **URJA POWER SAVER CARD** is its **Terahertz Chip Technology**. This technology reshapes the flow of electricity into a cleaner sine wave, reducing unwanted heat, preventing unnecessary current loss, and protecting your home from electrical surges.

The card also contains over **20,000 negative ions**, which help neutralize excess positive ions in the environment.

**KEY BENEFITS YOU'LL GET**

Save up to **30%** on your electricity bills  
Protect your appliances from damage and extend their life span  
Maintain a more stable, safer electrical supply  
Contribute to a cleaner, greener planet  
No maintenance required – just place it on your **MCB or MAIN SWITCH BOARD** and let it work  
Whether it's your home, office, or business, the **URJA POWER SAVER CARD** delivers consistent savings, reliable protection, and a step towards eco-friendly living.

**BENEFITS OF URJA POWER SAVER CARD**

Reduces wastage and helps save up to **30%** on electricity bills.

Over **20,000 negative ions** help neutralize harmful positive ions, improving the electrical atmosphere.

Works continuously without needing replacements or repairs.

No wiring or technical setup; simply place on the **MCB or MAIN SWITCH BOARD**.

Maintains a steady power supply for smooth appliance performance.

Works continuously without servicing or replacement.

Durable performance for **10 YEARS**

Environmentally safe and supports sustainable energy use.

Works for homes, offices, shops, factories, and more.

Works continuously with zero upkeep.

Ensures maximum efficiency from your electrical system.

**FEATURES AND DETAILS**

**URJA POWER SAVER CARD IS FOR**

Homes, Offices, Factories, Hotels, Schools, Shops, Industries, etc.

**USED MATERIAL FOR THIS CARD** – 20,000+ Negative Ions, Terahertz Chip.

**Size** – 85×54 mm.

**Thickness** – 1–1.4 mm. Coverage **Range** – 50–80 cm around the card.

**Warranty** – 3 years Save power and electricity with the advanced **URJA POWER SAVER CARD**, designed to deliver high-grade energy optimization and

protection with a **10-year shelf life**.

The **URJA POWER SAVER CARD** is easy to install – simply place it on your MCB or main switchboard and start saving.

**No harmful emissions or side effects**

**No external power supply required 100% eco-friendly & pollution-free**

**No maintenance cost**

**Completely waterproof**

**Highly resistant to high temperatures**

The **URJA POWER SAVER CARD** will help you reduce electricity bills, protect your appliances, and ensure stable energy usage with satisfaction.

#### HOW TO INSTALL URJA POWER SAVER CARD

**URJA POWER SAVER CARD** is very easy to install.

Please follow the steps below:

Step 1: Peel off the 3M sticker from the back of the card.

Step 2: Stick the card on the upper or bottom part of the **MCB or MAIN SWITCH BOARD** depending on the available space.

**NOTE:** This card only works on MCB and MAIN SWITCH BOARD Connections

**1 to 6 KW (1 Card) If using a 3 phase connection, 1 extra card will be needed.**

#### CONNECTION NUMBER OF CARD REQUIRED

1 – 6 KW 1 CARD / 6 – 12 KW 2 CARDS / 12 – 18 KW 3 CARDS / 18 – 24 KW 4 CARDS / 24 – 30 KW 5 CARDS / 30 – 36 KW 6 CARDS / 36 – 42 KW 7 CARDS / 42 – 48 KW 8 CARDS / 48 – 54 KW 9 CARDS / 54 – 60 KW 10 CARDS

#### LEGAL DISCLAIMER

The **URJA POWER SAVER CARD** is an ISO 9001:2015 certified product, designed and manufactured in compliance with applicable legal and industry standards. It is entirely lawful to use, requiring no internal wiring, alterations, or direct connection to the meter box, and is instead installed externally on **MCB or MAIN SWITCH BOARDS**. The product has been developed to address the ongoing concern of electricity savings in residential, commercial, and industrial settings by offering an innovative and efficient approach aimed at reducing electricity costs. While extensive testing and customer feedback indicate notable benefits in energy efficiency, actual

results may vary depending on factors such as electrical load, environmental conditions, installation practices, and usage patterns. All performance related claims are based on typical case scenarios under controlled or common usage conditions, and the product's durability, efficiency, and effectiveness are dependent on proper handling and adherence to installation guidelines. The company remains committed to quality, innovation, and customer satisfaction, having served numerous clients successfully, and encourages all users to follow operational instructions to maximize the intended benefits.
